

## Q&A for RFP 165-16-201 - Drug Testing Cups/Kits

- 1) Is the “flat” cup a mandatory requirement? (I’m assuming this is for photocopying purposes). If so, will alternates be considered?

**The flat panel cup is preferred**

- 2) The bid specifies 20,000 cups/annum. Would there be a way to gauge the order amounts and frequency?

**We’re open to proposals including shipping options to further reduce costs but we’re thinking 5,000 cups shipped quarterly would be the longest span between shipments as well as the most we could handle at this time.**

- 3) PPX is listed as a drug needed on the cup. However, the cup also needs to be CLIA waived. PPX is currently not available on a CLIA waived cup. Would FDA approved cups only be acceptable?

**CLIA waived cups are sufficient**
