

CORONAVIRUS DISEASE 2019 (COVID-19)

[CDC.gov/COVID-19](https://www.cdc.gov/COVID-19)

April 5, 2021

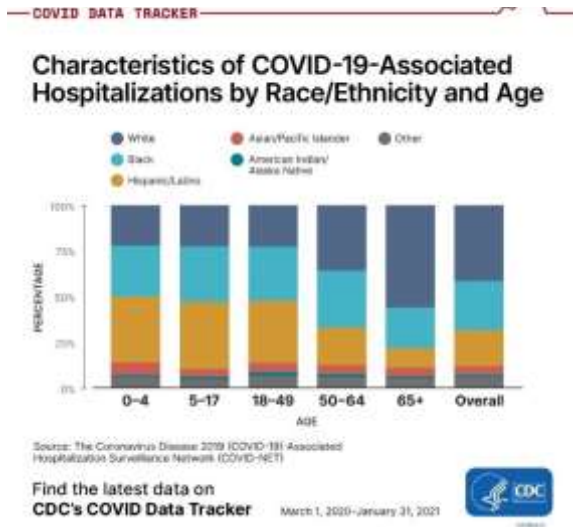

This message includes updates on the [COVID-19](https://www.cdc.gov/COVID-19) response from CDC. The COVID-19 Outbreak is a rapidly evolving situation and information will be updated as it becomes available.

Cleaning and Disinfecting Your Home

Cleaning with a household cleaner that contains soap or detergent reduces the amount of germs on surfaces and decreases risk of infection from surfaces. Disinfection to reduce transmission of COVID-19 at home is likely not needed unless someone in your home is sick or if someone who is positive for COVID-19 has been in your home within the last 24 hours. Follow recommended steps for cleaning and disinfecting your home when someone is sick.

COVID-NET Laboratory-confirmed COVID-19 hospitalizations

Did you know? CDC's COVID-NET works with more than 250 hospitals in 14 states to monitor COVID-19-associated hospitalizations by age, race and ethnicity, sex, and underlying health conditions. Explore trends in COVID-19-associated hospitalizations through interactive dashboards on CDC's COVID Data Tracker.

Getting Your COVID-19 Vaccine

Because COVID-19 is a new disease with new vaccines, you may have questions about what happens before, during and after your vaccine.

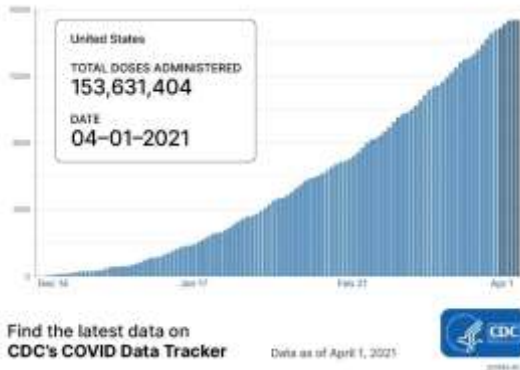

We have tips to help you:

- Find a COVID-19 vaccine
- Know what to expect at your COVID-19 vaccination appointment
- Know if you need a second shot
- Know what activities you can start doing once you are fully vaccinated

The Race to Vaccinate

Total COVID-19 Vaccine Doses Administered

COVID Data Tracker Weekly Review

As of April 1, 2021, nearly 154 million doses of COVID-19 vaccine have been administered in the United States. This is tremendous progress.

However, we are now seeing an increase in COVID-19 cases that include new and emerging COVID-19 variants, which threaten our progress.

The race to contain the virus is underway, and our actions today will determine when we stop its spread. Read about cases, vaccines and more in CDC's [COVID Data Tracker Weekly Review](#).

Coronavirus Disease 2019 (COVID-19) in the U.S.

April 5, 2021

US states, territories, and District of Columbia have reported 30,532,965 cases of COVID-19 in the United States.

CDC provides updated U.S. case information online daily.

In addition to cases, deaths, and laboratory testing, CDC's COVID Data Tracker now has a [Vaccinations](#) tab to track distribution of COVID-19 vaccines in your state.

U.S. Cases
